Computer Assisted Orthopaedic Surgery

14th Annual Meeting of CAOS – International Final Program

Honorary President: Paolo Cherubino
President: Norberto Confalonieri
Welcome to our 14th C.A.O.S. Meeting
Milan Italy, June 2014

Dear Friends,

The 14th Annual Meeting of the International Society for Computer Aided Orthopaedic Surgery (CAOS) will be held in Milan, Italy, from 18 to 21 of June, 2014.
It is a great honour and pleasure that the Executive Board and the Assembly of our Association have decided to hold the 14th annual meeting in Milan.
I am proud to invite you to attend this gathering of surgeons, biomechanics engineers, companies and researchers, who are the world’s leading experts in the fields of computer and robotic assistance in orthopaedic and traumatology surgery.

A special feature of this event will be the combined sessions with the most important Italian and European scientific associations: S.I.O.T. (Italian Society Orthopaedic and Traumatology), E.H.S. (European Hip Society) and S.I.G.A.S.C.O.T. (Italian Society Knee, Arthroscopy, Sport, Cartilage and Orthopaedic Technology partner of E.S.S.K.A. and E.K.A.).
A special pre-congress event will be held on Wednesday 18th June, with a lot of Educational Re-live surgeries and mini-debates about the most controversial aspects of these surgical procedures with computer and robotic tools.
There will be an Exhibition and Presentations of the most important Companies involved in this field with workshops, talks and video-surgeries about the new products and technologies.

Milan is the financial capital of Italy, the power engine of the Italian economy, a great combination of culture, art, fashion, unforgettable Italian food & wine, nightlife and unique way of life. Milan moves at a fast pace but also offers relaxing breaks, with mountains, lakes and golf courses nearby. Just outside the city the beautiful Lake Como is waiting for you. We are organizing special events for the social programme with many cultural, gastronomic and fashion Italian surprises.

I hope that this CAOS meeting will be a great occasion for fruitful collaboration and the development of long-lasting relationships between clinical and basic research and a most memorable stay for you and your families in Milan.

I am very glad to welcome you all in Milan, Italy!

Norberto Confalonieri M.D.
Orthopaedic Surgeon
President of CAOS – International 2014
**President of CAOS - ITALY & Conference Chairman**

Norberto Confalonieri  
Milan, Italy

**Program Committee**

**Brian Davies**, London, UK  
Chairman Program Committee 2014

08.20 Welcome and Introduction  
N. Confalonieri

**SOME OTHERS ASPECTS (8’+2’ discussion)**

**Chairmen: S. Bignozzi, G. M. Calori**

08.30 MIS in the Hip Surgery: The Brexis Short-Stem  
_C. Cucciniello, F. Lonati, D. Ducì, F. Curtì, C. Borsotti_

08.40 Potentialities of wearable augmented reality in orthopaedics  
_P. Parchi, N. Piolanti, L. Andreani, F. Cutolo, C. Freschi, S. Mascioli, M. Ferrari, M. Lisanti_

08.50 Management of long bone complex deformities with the computer-assisted ortho-suv frame® hexapod external fixation system  
_B. Bertani, L. Pedrotti, G. Tuvo, S. Lucanto, F. De Rosa, R. Mora_

09.00 Computer-assisted navigation systems in oncological spine surgery  
_S. Bandiera, S. Colangeli, A. Gasbarrini, G. Barbanti Brodano, S. Terzi, R. Ghermandi, M. Girolami, S. Boriani_

09.10 Computer-assisted surgery: a teacher of TKAs  
_F. Conteduca, R. Iorio, D. Mazza, G. Bolle, A. Redler, L. Valeo, A. Ferretti_

**ACL AND HIP (8’+2’ discussion)**

**Chairmen: R. Pessina, A. Piccioli**

09.20 Reliability of a smartphone app in diagnosis of ACL rupture  
_L. Valeo, R. Iorio, D. Mazza, A. Ferretti_

09.30 The influence of tunnel tibial slope on postoperative knee laxity after ACL reconstructions  
_C. Signorelli, T. Bonanzinga, N. Lopomo, A. Grassì, F. Raggi, G.M. Marcheggiani Muccioli, M. Marcacci, S. Zaffagnini_

09.40 Risultati clinici e radiografici a breve termine, dell’impianto della protesi monocompartmentale mediale con tecnica robotizzata MAKO RIO System  
_P. G. Perazzini, P. Sembenini, A. Marangon, F. Alberton_

09.50 Intraoperative validation of the accuracy of limb length and offset measure with BrainLab Navigation system compared to standard radiology and clinical measurements. A prospective comparative study  
_L. Orlandini, V. Meroni, O. Consonni, M. Ulivi, V. Sansone_
UKR (8’+2 di discussion)

Chairmen: F. Catani, R. D’Anchise

10.00 Artroprotesi totale di anca con metodica MAKO-RIO (MAKOplastica): la nostra esperienza
P.G. Perazzini, A. Marangon, P. Sembenini, F. Alberton

10.10 MAKO robotic arm system (MAKOplasty) Unicompartmental Lateral Knee Arthroplasty using the MAKO robotic arm system (MAKOplasty)
G. Franceschi, D. Bertolini, C. Khabbazè, A. Rovini, R. Nardacchione

10.20 Is there any benefit in varus-valgus stability using navigation in unicompartmental knee arthroplasty? A kinematic assessment
N. Confalonieri, S. Bignozzi, A. Manzotti

BIOMECHANICS – KINEMATICS (8’+2 discussion)

Chairmen: C. Frigo, S. Giannini

10.30 Automatic landmark processing from bone surface in knee surgery based on resection guides specific to patient anatomy
P. Cerveri, M. Marchente, N. Confalonieri, A. Manzotti, G. Baroni

10.40 Patello-femoral joint tracking in navigated total knee arthroplasty
C. Belvedere, A. Ensini, A. Leardini, A. Feliciangeli, S. Giannini

10.50 Post-operative assessment of the efficacy of Modern surgical technologies for total knee replacement
A. Leardini, C. Belvedere, A. Ensini, S. Tamarri, M. d’Amato, S. Giannini

11.00 Patient-specific instrumentation in total knee arthroplasty
A. Ensini, C. Belvedere, A. Leardini, S. Tamarri, P. Barbadoro, S. Giannini

TKA (8’+2 discussion)

Chairmen: V. Calvisi, G.V. Mineo

11.10 Patient Specific Instruments is realy usefull? Prospective study of 50 prenavigated total knee replacement
C. Chemello, G. Costacurta

11.20 Three different cruciate sacrificing TKA designs: no intraoperative kinematic differences and no clinical differences at 2 years follow up
S. Bignozzi, S. Zaffagnini, I. Akkawi, T. Marko, D. Bruni, F. Colle, M. Marcacci
11.30 Comparative study on pre intra and post-operative assessment of the mechanical axis in knee arthroplasty performed with a computerised navigation system
A.M. Molinar Min, F. Amberti, D. Agosta, W. Vogel

11.40 CT evaluations in 15 TKAs using Patient Specific Instruments. Our experience
V. De Santis, A. Burrofato, R. D’Apolito, C. De Ieso, D. Santagada, A. Cipriani, F. Ferrara, N. Magarelli

11.50 Outcomes of computer navigated SCORE® highly congruent mobile-bearing TKA at minimum 5 years follow-up
A. Todesca, L. Garro, M. Penna, H.J. Bejui

12.00 Computer Assisted Total Knee Arthroplasty: A Medium 2.5 Years Follow-up of 200 Cases
D. Notarfrancesco, A. Lamberti, F. Aquino, A. Zara, L. Russo

12.10 Validazione del software pinless Alignment Verification Workflow Knee 25 Brainlab e del sistema DASH in protesi totale ginocchio eseguita con tecnica computer assistita
M. Ulivi, V. Sansone

12.20 Navigazione computerizzata, mini invasivita’ e design delle protesi nella chirurgia sostitutiva articolare del ginocchio
S. Santamaria

12.30 Timing in navigazione: è possibile ridurre i tempi chirurgici? Nostra esperienza sui primi 100 casi con follow up di 1 anno
S. Iarussi

12.40 – 13.50 Light Lunch and Assembly of CAOS ITALY
Chairmen: B.L. Davies, F. Picard

14.00 Introduction to CAOS - N. Sugano
14.20 - 18.00 Educational Re-live surgery

MINI-DEBATES

Videosurgery+ Personal experience (12’) + Discussion [6’]

14.20 TKR:
   Robot - E.K. Song
   Navigation - D. Saragaglia
   Discussion

14.50 TKR:
   E-libra - F. Bernetti
   Orthopilot – S. Hakki
   Discussion

15.20 UKR Robots:
   Mako – M. Conditt
   Blue Belt Technologies, Inc - B. Jaramaz
   Discussion

16.20 TKR:
   PSI -TAC – R. Harvey
   PSI - RMN – D. Stulberg
   Navigation – J.Y. Jenny
   Discussion

16.50 THR:
   Hip Sextant – S. Murphy
   Computer – D. Lazovic
   Discussion

17.20 THR:
   Robot – D. Padgett
   Navigation – K. Deep
   Discussion

17.50 Close Remarks - A. Ferretti

Welcome/Cocktail Reception Combined with CAOS-International

18:30 Reception to be held in the industrial exhibition area – open to all registrants of the pre-course and of the 14th Annual Meeting of C.A.O.S. International
SESSION 1: UNI

Chairmen: S. Bignozzi, B. Marelli

08.00 The accuracy of a robotically-controlled freehand sculpting tool for unicondylar knee arthroplasty
   J. Smith, F. Picard, J. Lonner, B. Hamlin, P. Rowe, P. Riches, A. Deakin

08.10 The learning curve of a novel handheld robotic system for unicondylar knee arthroplasty
   D. Wallace, A. Gregori, F. Picard, J. Bellemans, J. Lonner, R. Marquez, J. Smith, A. Simone, B. Jaramaz

08.20 Short-term outcomes of robotic-arm assisted bicompartimental knee arthroplasty

08.30 Handheld Robot-Assisted Unicondylar Knee Arthroplasty: A Clinical Review

SESSION 2: Osteotomy And Femoral Acetabular Impingement

Chairmen: E. De Momi, D. Saragaglia

08.40 Results of Navigational Open Wedge High Tibial Osteotomy Compared with Conventional Cable Technique

08.50 Determinants of Femoral Head Displacement after Rotational Acetabular Osteotomy for Hip Dysplasia
   M. Takao, T. Nishii, T. Sakai, H. Yoshikawa, N. Sugano

09.00 Effect of medial opening wedge high tibial osteotomy on intraarticular knee and ankle contact surface pressures
   E. Suero, Y. Sabbagh, R. Westphal, N. Hawi, M. Citak, F. M. Wahl, C. Krettek, E. Liodakis

09.10 The effect of tibial rotation during high tibial osteotomy on the contact pressures in the knee and ankle joints
   N. Hawi, E. Suero, Y. Sabbagh, R. Westphal, M. Citak, F. Wahl, C. Krettek, E. Liodakis
09.20  Navigated acetabular reorientation during periacetabular osteotomy 
a computer-assisted Cadaver Study
T. M. Ecker, M. Puls, J. D. Bastian, M. J. B. Keel, M. Tannast, L. Liu, G. Zheng, K. A. Siebenrock

09.30  In vitro evaluation of functional hip center method detection using only tibial tracker for computer assisted tibial osteotomy surgery
Z. Dib, G. Dardenne, N. Poirier, P. Huet, C. Lefevre, E. Stindel

09.40  3D Ultrasound-Guided Femoroacetabular Impingement Surgery: A Cadaver Study
L.L. Buchan, J.C. Doucette, I. Hacihaliloglu, R.E. Ellis, M.K. Gilbart, D.R. Wilson

09.50  A comprehensive computational framework to diagnosis and plan Femoroacetabular impingement
L. Liu, P. Haefeli, T. Ecker, K. Siebenrock, L.P. Nolte, G. Zheng

Coffee Break and POSTERS SESSION Part 1

10:00  S1-S8 Were rated “SPECIAL POSTERS” indicating an exceptional quality of this work. Posters will be presented in five sessions, during which the authors of the respective session’s posters will be present at the poster booths. However, all posters and special posters of all sessions will be on display during the entire time of the meeting.

S1)  Is there any benefit in varus-valgus stability using navigation in unicompartmental knee arthroplasty? A kinematic assessment
N. Confalonieri, S. Bignozzi, A. Manzotti

S2)  Unicompartmental knee arthroplasty versus total knee arthroplasty. Are we able to create the forgotten joint?
H.A. Zuiderbaan, C. Ismael, S. Khamaisy, R. Thein, S. Paul, A. Pearle

S3)  Validation of patient specific surgical guide for pelvic osteotomy

S4)  Tool bracing for performance improvement in simulated femoral neck osteoplasty
J. Kooyman, Y. Po Liu, M. Gilbart, A.J. Hodgson

S5)  Potentialities of wearable augmented reality in orthopaedics
P. Parchi, N. Piolanti, L. Andreani, F. Cutolo, V. Ferrari, M. Ferrari, M. Lisanti

S6)  Repeatability analysis of manual segmentation for high resolution and low resolution MRI images of hip joints
X. Kang, D. R. Wilson, A. J. Hodgson

S7)  The stress distribution between prosthesis and bone interface in 10 total knee replacement models during squatting position: a finite element study
P. Sripihrom, C. Siramanakul

S8)  Short-term results of patient-specific total knee arthroplasty compared with conventional technique
E. Song, J. Seon, H. Park, K. Lee, C. Park, H. Kim, B. Na
1) Mid-term results of 29 computer-assisted osteotomies for genu valgum deformity.  
*D. Saragaglia, B. Chedal-Bornu*

2) Patient Specific instrumentation for Complex Orthopaedic Surgery – A report of 2 cases  
*K.S. Leung, N. Tang, K.L. Liu, L.H. Hung, C.S. Chui*

3) Fragment mobility of the acetabulum in periacetabular osteotomy performed through the pararectus approach – a navigated cadaver feasibility study  
*T.M. Ecker, J.D. Bastian, L. Liu, G. Zheng, M. Tannast, P. Haefeli, M.J.B. Keel, K.A. Siebenrock*

4) Investigation of acetabular sector angle by three-dimensional computed tomography in curved periacetabular osteotomy (CPO)  
*S. Nakasone, T. Yamauchi, H. Horizono, F. Kanaya*

5) Unicompartmental lateral knee arthroplasty using the MAKO robotic arm system (MAKOplasty)  
*G. Franceschi, D. Bertolini, C. Khabbazè, A. Rovini, R. Nardacchione*

6) Change of unaffected limb gait pattern after unilateral total knee arthroplasty  
*D.H. Ro, G.H. Moon, K.Y. Chung, Y. Cho, Y. Lee, S. Kim, S. Lee, M. C. Lee*

7) Primary mechanical stability of unicondylar knee replacement implants  
*H.G. Wells, A. Thomson, P.E. Riches*

8) Two year survivorship of robotically guided unicompartmental knee arthroplasty  
*T. Coon, M. Roche, A. Pearle, J. Dounchis, T. Borus, F. Buechel*

9) Quantifying the soft tissue envelope during varus/valgus test in cadaveric specimens  
*A.A. Adewumi, P.J. Rowe*

10) 500 consecutive robotic arm assisted medial UKA: an outpatient procedure that consistently increases ROM  
*F. F. Buechel*

11) Robotic arm assisted UKA: the Makoplasty Experience  
*A. Ranalletta, C. Ranalletta*

12) Effect of navigation on posterior slope of Oxford unicompartmental knee replacements in low volume surgeons  
*G.K.M. Pemmaraju, A. Thomas, J.J. Malal, S. Deshpande*

---

**ROOM 2:**

**10.00/10.50 - NATIONAL CAOS CHAPTERS MEETING**
SESSION 3: Technical Innovation

Chairmen: L. Nolte, E. Stindel

11.00 The Aspherical Hip: An In-Vitro Study  
J. Rudan, S. Zakani, R. E. Ellis

11.10 The influence of the native, ruptured and reconstructed Medial Patellofemoral Ligament (MPFL) to 3D-Patella-Tracking. Development of a dynamic knee-simulator using an industrial robot and an optical tracking system  
V.R. Hofbauer, J. Glasbrenner, T. Bittrich, C. Kosters, D. Rosenbaum, M.J. Raschke

11.20 Ultrasound-based automatic registration for minimally invasive orthopedic surgery  
H.E. Fakhfakh, G. Llort-Pujol, C. Hamitouche, E. Stindel

11.30 Design and validation of a smart knee brace to measure varus-valgus stability  
C.P. Bell, P. A Meere, I. Borukhov, P.S. Walker

11.40 Automated laser registration for computer assisted orthopaedic surgery  
A. Motesharei, V. Joshi, P. Rowe

11.50 Accuracy of a visible spectrum single camera drill mounted tracking system for knee arthroplasty  
N. Smith, V. Stankovic, P.E. Riches

LUNCH BREAK and Special Session CAOS and SIGASCOT

(Italian Society of Knee Surgery, Arthroscopy, Cartilage, Sport Trauma and Orthopaedic Technology)

Chairmen: P. Adravanti, N. Confalonieri  
Discussants: A. Ferretti, P. Randelli

12.00 CAOS and research - F. Rodriguez Y. Baena
12.12 Navigation in kinematic assessment - S. Zaffagnini
12.24 Navigation and TKR - J. Y. Jenny
12.36 Navigation and osteotomies - D. Saragaglia
12.48 Robot and TKR: lights and shadows – J.A. Koenig
13.00 New Trends in knee reconstruction – F. Picard

13.12 Discussion
SESSION 4: TKR1: PSI and Kinematic

Chairmen: W. Bargar, R. Ellis

13.30 Preoperative kinematic navigation for surgical approach choice in TKR
    R. Hart

13.40 Patient specific instruments for Total Knee Arthroplasty: A Novel Technique with an Open Platform
    M.A. Hafez

13.50 Intra-operative analysis of the kinematic behavior of a total knee replacement by a navigation system. Initial experience and further development
    J. Y. Jenny, Y. Diesinger, F. Firmbach

14.00 Do different PSI Software programs produce similar preoperative plans when applied to a single implant system?
    S. D. Stulberg, N. Goyal

14.10 On the unreliability of collateral stability assessment in knee arthroplasty with the knee locked in screw home position. A kinetic – kinematic mechanical study
    P.A. Meere, C.P. Bell, I. Borukhov, P. Rathod, P.S. Walker

14.20 Improvement of semi-automated 3D kinematic measurement of total knee arthroplasty from X-ray fluoroscopic images
    T. Yamazaki, R. Kamei, T. Tomita, Y. Sato, H. Yoshikawa, K. Sugamoto

14.30 Accuracy of CT-based custom-made surgical templating instrumentation for patella resection in total knee arthroplasty – in vitro study

14.40 Comparison of the kinematic behaviour of a total knee replacement with either floating platform with posterior cruciate retaining or rotating platform with posterior cruciate substitution with an intra-operative navigation system
    J.Y. Jenny
15:00 S9-S14 Were rated “SPECIAL POSTERS” indicating an exceptional quality of this work. Posters will be presented in five sessions, during which the authors of the respective session’s posters will be present at the poster booths. However, all posters and special posters of all sessions will be on display during the entire time of the meeting.

S9) Accuracy of three-dimensional preoperative templating in total hip arthroplasty using navigation  
T. Fujishiro, S. Hayashi, N. Kanzaki, S. Hashimoto, M. Kurosaka

S10) The Learning Curve Associated with Robotic-Assisted Total Hip Arthroplasty  
J.M. Redmond, A. Gupta, J.E. Hammarstedt, A. Petrakos, C. E. Stake, B.G. Domb

J.M. Redmond, A. Gupta, J.E. Hammarstedt, A. Petrakos, C.E. Stake, B.G. Domb

S12) The effect of femoral neck anteversion on foot progression angle  

S13) Accuracy of combined anteversion in THA with the stem first technique using image-free navigation  
S. Fukunishi, S. Nishio, T. Fukui, Y. Fujihara, S. Okahisa, S. Yoshiya

S14) Revision total hip arthroplasty using imageless navigation with the concept of combines anteversion  
J. Chang, I. Kim, A. Bajaj, J. Yoo

13) Reduction of the dose of ionising radiation in navigated transpedicular screw placement  
R. Hart

14) Sensitivity analysis of geometric and dynamic variables of the scoliotic spine on the computation of intervertebral efforts  
G. Abedrabbo, O. Cartiaux, P. Fisette, M. Raison, P. Maudaudens, C. Detrembleur, M. Mousny

15) Clinical Comparison of Navigation Assisted  
T. Wei, L. Yajun, J. Peihao

16) Intraoperative 3D Navigation  
L. Yajun, T. Wei, L. Bo, L. Qin, Z. Guilin, S. Yuzhen

17) The New concept of Clinical Application  
T. Wei, L. Yajun, L. Bo, H. Lin, L. Zhiyu, Y. Qiang, S. Yuqiong, H. Da, X. Yonggang, S. Yuzhen
18) Three-dimensional assessment of the mechanical axis crossing point of the knee joint line in the weight-bearing standing position in healthy elderly subjects
   A. Arumi, T. Sato, S. Watanabe, O. Tanifuji

19) Three dimensional analysis revealed that a tapered wedge cementless Accolade TMZF stems contacted femoral canals at medial and distal zones
   K. Tokunaga

20) Three-dimensional analysis of forearm deformity in congenital radioulnar synostosis
   M. Nakasone, S. Nakasone, C. Futenma, M. Kinjo, K. Horikiri, T. Kinjo, F. Kanaya

21) Development of a smart tool based on human intention estimation for accurate and fast operation
   P. Yen, S. Hung

22) Assessment of skin markers in the lower limb for navigation surgery - A fresh-frozen cadaver study
   S. Hung, P. Yen, G.F. Tseng

23) Evaluation of a six-dof electromagnetic tracker
   E. Lugez, D.R. Pinchora, S.G. Akl, R.E. Ellis

24) Semi-automatic 3D quantifications of vertebral fracture restoration based on CT data
   J.A. Richolt, G. Le Pennec, X. Barreau

25) Insertion accuracy of acetabular cup placement using a smartphone in a cadaveric study
   H. Kurosaka, S. Fukunishi, S. Nishio, T. Fukui, Y. Fujihara, S. Okahisa, S. Yoshiya

26) Mater-slave robot-assisted fracture reduction: a preliminary study in long bone shaft
   H. Wei, L. Hong, W.J. Qiang

27) TLEMsafe: a European project to improve predictability and success of severe muscoloskeletal surgery
   P. Jutte, V. Carbone, V. Weerdesteyn, L. Vigneron, M. Damsgaard, R. Sitnik, T. Feilik, N. Verdonschot

28) Applying bracing to orthopaedic surgery: reducing drill plunge depth with a damper-based bracing device
   J. McIvor, A.J. Hodgson

29) Design of a less-obtrusive flexible optical tracker for computer assisted orthopaedic surgery
   M. Semple, A. Hodgson

30) Fluoroscopic radiographic markers for measuring tibial torsion based on computed tomography reconstructed radiographs – an accuracy and feasibility study
   Y.A. Weil, D. Hakimian, A. Khoury, M. Liebergall

31) Feasibility study of a new semi-automatic detection method of joint penetration during triple-screw internal fixation for femoral neck fracture
   A. Englebert, O. Cartiaux
32) A development of coded infrared LED pattern technology for real-time instrument localization  
   **P. Yuan Lee, S. Yang, M. Hu, H. Lin, M. Wang**

33) An approach for minimal invasive insertion of pedicle screws using a navigated robotic assistance system  
   **S. Sahm, H. Roth, D. Scale, A. Von Schilling, G. Winkler, U. Spetzger, J. Wahrburg**

34) Practical Guide to plan and evaluate  
   **O. Cartiaux, B.G. Francq**

35) Evaluation of bone deformity on accuracy of a computer-assisted guidance system for total knee arthroplasty  
   **L.D. Angibaud, R.A. Liebelt, B. Gao, X. Silver, S. Gulbransen**
17.05  Radiographic Parameters Correlate with Change in Sagittal Pelvic Tilt after Hip replacement
   **J.D. Maratt, C. Esposito, K. M. Carroll, S.A. Jerabek, D.J. Mayman**

17.10  Preliminary validation study of the accuracy of cup orientation using the EOS imaging system as Measured by CT
   **A. Thomas, W.S. Murphy, J.H. Kowal, S.B. Murphy**

17.15  Robot-assisted spine surgery for improved safety: a prospective case-matched analysis
   **N. Lonjon, E. Chan-Seng, V. Costalat, B. Bonnafoux, M. Vassal, J. Boetto, F. Segnarbieux**

17.20  A Robot Assisted Surgical System
   **T. Wei, H. Xiaoguang, L. Yajun, F. Mingxing, L. Bo, S. Yuqing, H. Da, X. Yonggang**

17.25  End of the day
   **N. Confalonieri**
SESSION 6: TKR Outcomes

Chairmen: M. Hafez, S. Lavallée

08.00 The mobile bearing insert can reduce the patello-femoral contact pressure in total knee arthroplasty with CT-based navigation system
K. Takayama, T. Matsumoto, N. Shibanuma, H. Muratsu, T. Matsuzaki

08.10 CAS vs Patient matched total knee replacement: X-ray and CT-scan evaluation
F. Mancuso, P. Di Benedetto, V. Cainero, R. Gisonni, A. Beltrame, A. Causero

08.20 Three different cruciate sacrificing TKA designs: no intraoperative kinematic differences and no clinical differences at 2 years follow up
S. Bignozzi, S. Zaffagnini, I. Akkawi, T. Marko, D. Bruni, F. Colle, M. Marcacci

08.30 Where does all the time go in computer assisted surgery?
D.R. Lionberger, P.P. Talati

08.40 Which tibial tray design achieves maximum coverage and ideal rotation: anatomic, symmetric, or asymmetric? An MRI-based study
S.D. Stulberg, N. Goyal

08.50 Complications resulting from tracker pin-sites in computer navigated total knee replacement
A. Thomas, G. Pemmaraju, S. Deshpande

SESSION 7: THR (navigation) Trauma

Chairmen: L. Joskowicz, N. Sugano

09.00 Evaluation of Ultrasound-based Navigation System with CT in total hip arthroplasty

09.10 Accuracy and precision of acetabular component placement with imageless navigation in obese patients

09.20 Reproduction of femoral offset in Navigated Hip arthroplasty – How accurate are we?
P. Ellapparadja, V. Mahajan, K. Deep

09.30 The safe zone for acetabular component orientation in hip arthroplasty
W.S. Murphy, J.H. Kowal, S.B. Murphy
09.40 Does computer navigation in total hip arthroplasty better restore native combined anteversion?
   G. Li, T. Tsai, D. Dimitriou, Y. Kwon

09.50 Targeting a new safe zone – a step in the development of patient-specific component positioning in hip arthroplasty

10.00 Three dimension fluoroscopy-based navigation for dorsal percutaneous instrumentation in traumatic vertebral fractures
   P. Merloz, S. Ruatti, A. Moreau Gaudry, E. Chipon, C. Dubois, J. Tonetti, M. Milaire, G. Kerschbaumer

10.10 Haptic interface for computer-assisted patient specific preoperative planning in orthopedic fractures surgery
   I. Kovler, L. Joskowicz, Y. Weil, J. Salavarieta

10.20 Accuracy of image-guided iliosacral screw placement using a hybrid operating theater
   P.H. Richter, A. Schicho, F. Gebhard

Coffee Break and POSTERS SESSION Part 3

10.30 S15-S20 Were rated “SPECIAL POSTERS” indicating an exceptional quality of this work. Posters will be presented in five sessions, during which the authors of the respective session’s posters will be present at the poster booths. However, all posters and special posters of all sessions will be on display during the entire time of the meeting.

S15) Automatic landmark processing from bone surface in knee surgery based on resection guides specific to patient anatomy
   P. Cerveri, M. Marchente, N. Confalonieri, A. Manzotti, G. Baroni

S16) Accuracy of stem alignment is affected by stem design and surgical approach
   S. Hayashi, T. Fujishiro, S. Hashimoto, N. Kanzaki, M. Kurosaka

S17) EOS Imaging is Accurate for Preoperative Total Hip Arthroplasty Templating
   A.S. McLawhorn, J.D. Maratt, K.M. Carroll, D.J. Mayman

S18) Accuracy of cup positioning, COR Restoration and achieving desired hip length and offset following robotic THA
   S.A. Jerabek, K. Carroll, J.D. Maratt, D.J. Mayman, D.E. Padgett

S19) Influence of computer-assisted leg length and offset measurements on implant features in total hip arthroplasty
   M.M. Schneider, P. Koenen, T. Brockamp, M. Frohlich, A. Wafaisade, M. Balke, B. Bouillon, H. Bathis
S20) How consistent is the 3D orientation of orthopods – a study of tal targeting and given orientation most commonly practiced
K. Deep, M.S. Khan, A.H. Deaking, R. Abboud

36) A simulation study of Burch-Schneider cage 3D templating for acetabular bone defects

37) A 40 mm head significantly improves range of motion compared to a 28 mm head in total hip arthroplasty using CT-based Navigation system
K. Tsuda, K. Haraguchi, J. Koyanagi, S. Takahashi, R. Sugama, K. Fujiwara

38) The Effect of anterior capsule on stability and range of motion in computer assisted total hip replacement with posterior approach: a cadaveric study
P. Sriphirom, A. Vejjaijiva

39) Adjustment of leg length discrepancy using two different types of imageless navigation software in THA
F. Higuchi, S. Fukunishi, S. Nishio, Y. Fujihara, Y. Takeda, T. Fukui, S. Yoshiya

40) Intraoperative validation of the accuracy of limb length and offset measure with BrainLab Navigation system compared to standard radiology and clinical measurements. A prospective comparative study
L. Orlandini, V. Meroni, O. Consonni, M. Ulivi

41) Variation in Cup Orientation using Conventional Cup Alignment Techniques as Measured by CT
W.S. Murphy, J.H. Kowal, S.B. Murphy

42) EBRA is more accurate than crosstable lateral radiographs when compared to intraoperative measurement of acetabular version
P.K. Sculco, A.S. McLawhorn, D.J. Mayman

43) Do patients with unilateral Crowe 4 developmental dysplasia of the hip have femurs of equal length?

44) Does obesity affect cup position in computer navigated total hip arthroplasty
K. Deep, M. S. Khan, A.H. Deakin, V. Mahajan

45) A semiactive retractor holder for minimally invasive hip arthroplasty: a concept study
D. Putzer, S. Klug, M. Haselbacher, E. Mayr, M. Nogler

46) Is navigation in THR the way forward to avoid limb length discrepancy
P. Ellapparadj, V. Mahajan, K. Deep
47) Computer-assisted total hip arthroplasty: from pre-operative planning to post-operative assessment
   **J. Schmid, C. Chenes, S. Chagué, P. Hoffmeyer, P. Christofilopoulos, M. Bernardoni, C. Charbonnier**

48) Sensitivity analysis of biomechanical models for total hip arthroplasty
   **J. Eschweiler, M. Asseln, P. Damm, G. Bergmann, V. Quack, B. Rath, M. Tingart, K. Radermacher**

49) Anatomical head ceramic on ceramic total hip arthroplasty – a short term follow-up study
   **R. K. Sharma**

50) The differences between combined anteversion of anterior and posterior approach in total hip replacement

---

**ROOM 2:**

10.40/11.20 **FIRST BOARD EXECUTIVE MEETING**

**Combined Sessions: CAOS and EHS** *(European Hip Society)*

**Chairmen:** **N. Confalonieri, L. Zagra**

**Discussants:** **F. Bassini, J.A. Epinette**

11.20 Computer aided surgery for Bernese and other difficult osteotomies
   **R. Trebse**

11.30 Navigation in congenital hip dysplasia
   **H. Ohashi**

11.40 Computer navigation reduces the complications and enhances function as compared to conventional techniques
   **K. Deep**

11.50 Results & Technique for THR using the Mako robot hip system
   **M. Conditt**

12.00 Robotic hip replacement – Robodoc results – Are complications and time an issue?
   **B. Bargar**

12.10 The use of the transverse acetabular ligament for cup positioning. A randomised controlled trial
   **G. Meermans, J. Kats, J. Van Doorn**

12.20 The results of navigation, computer aided and robotic surgery in registries and Interpretation of Register data”
   **G. Labek**

12.30 Discussion

12.50 Close Remarks **L. Zagra**
Coffee Break and POSTERS SESSION Part 4

14.30 S21-S28 Were rated “SPECIAL POSTERS” indicating an exceptional quality of this work. Posters will be presented in five sessions, during which the authors of the respective session’s posters will be present at the poster booths. However, all posters and special posters of all sessions will be on display during the entire time of the meeting.

S21) Mid-high flexion instability in the replaced knee after iatrogenic popliteus tendon injury

S22) Patient specific guides for total knee arthroplasty. A cadaveric study
P. Merloz, S. Dao-Lena

S23) Clinical and radiological outcome of CT-based patient-specific cutting-blocks compared to conventional instrumentation in primary total knee arthroplasty: a single center cohort study with a minimum follow-up of 2 years
W. Anderl, L. Pauzenberger, R. Kolblinger, G. Kesselbach, G. Brandl, B. Kriegleder, B. Laky, E. Scwameis

S24) Analysis of coronal Prosthetic Alignment in TKA using three different Computer assisted Navigation Systems

C. Belvedere, S. Giannini, A. Ensini, A. Feliciangeli, A. Leardini

S26) Computer-aided patellar resurfacing in navigated total knee arthroplasty
C. Belvedere, A. Ensini, A. Leardini, S. Tamarri, A. Feliciangeli, S. Giannini

S27) MRI Analysis of anatomical variation of distal femoral rotational axis and its effect on flexion gap
S. Thati, A. Kaminskas, M. Ganapathi

S28) Thigh pull test in TKR: equivalent or different than heel push
P.A. Meere, C.P. Bell, I. Borukhov, P. Rathod, P.S. Walker

51) The effect of malrotation of tibial component of total knee arthroplasty on tibial insert during squatting. A finite element analysis
K. Osano, R. Nagamine, M. Todo, M. Kawasaki
52) Placement of a Femoral Posterior Condylar Trial Component Changes Extension Gap in Navigated Total Knee Arthroplasty Using the Pre-cut Technique  
*K. Yamada, K. Hoshino, K. Tawada*

53) Does patient specific guide improve clinical results on TKA?  
*T. Kawamoto*

54) Accuracy of digital templating for total knee arthroplasty: a step towards template-directed "patient-specific" instrumentation  
*S. Jerabek, K.M. Carroll, A.S. McLawhorn, D.J. Mayman*

55) Preoperative planning using computed tomography for total knee arthroplasty with stem and augment  
*T. Osamu, Y. Hiroshi, S. Takashi, W. Satoshi, O. Go, E. Naoto*

56) The effect of posterior tibia slope on the joint gap in posterior cruciate retained knee and posterior cruciate sacrificed knee: an experimental gap analysis on cadaveric study  
*P. Srisrichom, K. Srisom, K. Plthankaukul, A. Vejchaicheva, N. Wanaphphisut*

57) What is happening to our Knee Alignment?  
*M. Bayers-Thering, M.J. Phillips, L. Ryan, K.A. Krackow*

58) CT evaluations in 15 TKAs using Patient Specific Intruments. Our experience  
*V. De Santis, A. Burrofato, R. D'Apolito, C. De Ieso, D.A. Santagada, A. Cipriani, F. Ferrara, N. Magarelli*

59) Early outcomes utilizing a first-generation patient-specific TKA implant: a retrospective study  
*W. Kurtz, R. Sinha, G. Martin, K. Kimball*

60) Does the useoff navigation systems influence our operative procedure in knee arthroplasty?  
*P. Koenen, M.M. Schneider, M. Strohe, T. Brockamp, M. Frohlich, B. Bouillon, H. Bathis*

61) Computer-assisted surgery: a teacher of TKAs  
*F. Conteduca, R. Iorio, D. Mazza, G. Bolle, A. Redler, L. Valeo, A. Ferretti*

62) Measurement of the knee flexion angle with Smartphone-applications is precise and accurate  
*J. Y. Jenny, Y. Diesinger*

63) In vivo kinematics of the mobile-bearing cruciate retaining total knee arthroplasty  

64) Measurement of the posterior femoral offset: navigation is more precise than standard X-rays  
*J. Y. Jenny, Y. Diesinger*

65) Balancing a total knee replacement with a navigation system  
*J. Y. Jenny, Y. Diesinger*

66) Patient-specific templates for total knee replacement. Analysis of the learning curve in an academic department  
*J. Y. Jenny, Y. Diesinger*

67) Postoperative 3D analysis based on X-ray images  
*L. Vigneron, H. Delport, P. Peeters, S. De Boodt*
68) Outcomes of computer navigated SCORE highly congruent mobile-bearing TKA at minimum 5 years follow up  
   **A. Todesca, L. Garro, M. Penna, J. Bejui Hugues**

69) Comparisons of kinematics during stair motion in single radius total knee arthroplasty: cruciate retaining vs. substituting designs  
   **Y. Kii, T. Tomita, T. Yamazaki, K. Iwamoto, K. Futai, T. Yamashita, H. Yoshikawa, K. Sugamoto**

70) The lateral flexion gap narrow than medial flexion gap in valgus knee is it true?  
   A retrospective study reviews 81 cases in computer assisted total knee replacement  
   **P. Sriphirom, N. Wanaphisut**

71) The first result of a clinical rehearsal for robotic assisted fracture surgery  
   **S. Joung, C.W. Park, C.W. Oh, I.L. Park**

72) Computer assisted orthopaedic surgery guided by damage control for pelvic fractures in polytrauma patients: preliminary results of 39 patients  

73) Management of long bone complex deformities with the computer-assisted ortho-suv frame hexapod external fixation system  
   **B. Bertani, L. Pedrotti, G. Tuvo, S. Lucanto, F. De Rosa, R. Mora**

---

**SESSION 8: Others Joint And Oncology**

Chairmen: **G. Ferrigno, E. Thienpont**

15.30 Pre-designed corrective osteotomy guide in total ankle arthroplasty for adjusting loading axis of whole lower-extremities: in rheumatoid arthritis cases  
   **M. Hirao, H. Tsuboi, S. Akita, M. Matsushita, S. Ohshima, Y. Saeki, T. Murase, J. Hashimoto**

15.40 Comparing a novel 3D-CT reconstruction method to conventional 2D approaches for evaluating glenoid implant and screw position for reverse shoulder arthroplasty  
   **G. Venne, M. Pickell, D.R. Pichora, R. Bicknell, R.E. Ellis**

15.50 A patient-specific measurement technique to model the kinematics of the Shoulder in tennis players  
   **C. Charbonnier, S. Chagué, F.C. Kolo, A. Laderman**

16.00 Validation of a virtual implant planning system (VIPS) in distal radius fractures  
   **S.Y. Vetter, I. Muhlhauser, J. Von Recum, P.A. Grutzner, J. Franke**

16.10 Use of patient specific instrument for tarsal coalition resection in adolescents  
   **S. De Wouters, S. Traore, K.T. Duy, P. Docquier**

16.20 A reproducible technique for 3D kinematics analysis of the scapulo-thoracic motion during elevation of the arm in the scapular plane  
   **X. Ohl, P.Y. Lagacé, F. Billuart, N. Hagemeister, O. Gagey, W. Skalli**
16.30 Accuracy of patient-specific instrumentation for bone tumor resection within pelvis:
1st study of 11 patients
L. Paul, O. Cartiaux, G.A. Odri, F. Gouin

16.40 Pelvis Tumor Resection: 3D preoperative planning and navigation validation using a virtual specimen

16.50 Curettage of grade one chondrosarcoma in the long bones; a retrospective analysis of treatment assisted with fluoroscopy versus computer assisted surgery
J.G. Gerbers, P.C. Jutte

SESSION 9: TKR clinical outcomes / ACL

Chairmen: M. Marcacci, P. Meere

17.00 Ligament-specific Navigation-assisted Gap Balance Technique with Minimum Follow-up Eight Y ears
E. Song, K. Lee, J. Seon, H. Park, C. Park, H. Kim, Y. Seol

17.10 Lower post-operative D-dimer level in navigation-assisted TKA than conventional TKA - a prospective randomized control study
K. Siu, J. Ko, F. Wang, C. Wang, W. Chou

17.20 Total knee replacement at 10-year follow-up: computer-assisted system versus conventional instrumentation
A. Ensini, M. d’Amato, A. Feliciangeli, P. Barbadoro, C. Belvedere, A. Timoncini, A. Leardini, S. Giannini

17.30 An RCT to compare component placement in navigated TKA using original and streamlined registration processes

17.40 Evaluation of a new computer guidance system – new sites
G. Giordano, J. Ginther, B. Stulberg, S. Polakovic, N. Hohl

17.50 “A la carte” ACL reconstruction. Pre-operative laxity evaluation or intra-operative navigated measurements?
J. Y. Jenny, Y. Diesinger

18.00 End of the day
N. Confalonieri
PARALLEL SESSION 15.30/16.20 : Technical Innovation 2

Chairmen: C. Frigo, T. Hodgson

15.30 Hybrid closed-loop control of laser osteotomy based on optical coherence tomography and ablation induced acoustic emission: a preliminary study
Y. Zhang, H. Woern

15.40 Fully automatic hip CT segmentation by combining random forest regression based landmark detection with atlas-based segmentation
C. Chu, C. Chen, L. P. Nolte, G. Zheng

15.50 2D/3D SSM reconstruction method based on Robust Point Matching
M. Valenti, E. De Momi, W. Yu, G. Ferrigno, G. Zheng

16.00 Development of a patient-specific musculoskeletal model of the knee for clinical application and kinematic validation based on in-vivo measurements
M. Asseln, G. Al Hares, J. Eschweiler, K. Radermacher

16.10 Accuracy of an adjustable patient specific guide for acetabular alignment
M. Akbari Shandiz, J. R. Mackenzie, S. Hunt, C. Anglin

16.20 Hip osteoarthritis vs healthy subjects: a comparison of hip, pelvis and lower limb
S. Bendaya, J.Y. Lazennec, C. Anglin, R. Allena, N. Sellam, P. Thoumie, W. Skalli

16.30 Robust measurement of natural Acetabular orientation from AP radiographs using articulated 3D shape and intensity models
M. Ehlke, T. Frenzel, H. Ramm, H. Lamecker, C. Perka, M. Akbari, Shandiz, C. Anglin, S. Zachow

19.00 CAOS International Banquet

Attendance to the banquet requires booking in advance. Seats can be booked and paid online at www.caos-international.org/2014/. A limited number of seats may still be available at the registration desk on-site.

The Banquet will feature the following highlights:
- President greetings, thanks and introduction
  N. Confalonieri
- Presentation of the M.Muller Award for Excellence in Computer Assisted Surgery
  Kamal Deep
- Introduction of the new CAOS International President
  A. Hodgson
- Invitation to the 15th Annual Meeting
  A. Hodgson

Special Italian Events and Performances
08.00 Registration

SESSION 10: THR psi and robotics

Chairmen: J.D. Chang, B. Davies

08.30 Comparison between robotic-assisted and manual implantation of primary cementless total hip arthroplasty; minimum ten years follow-up results
N. Nakamura, N. Sugano, T. Sakai, I. Nakahara

08.40 Robot-assisted short stem total hip arthroplasty: a prospective randomized controlled trial
Y. Park, Y. Moon, S. Lim, D. Kim, I. Yeo

08.50 Robotic assisted total hip replacement: improved radiographic and clinical outcomes compared with manual techniques at minimum 1 year follow-up
R. Illgen, M. Conditt

09.00 Patient-specific instrument for acetabular cup orientation: accuracy analysis in a pre-clinical study
T. Hananouchi, E. Giets, J. Ex, H. Delport

09.10 Clinical accuracy of the Hip-Sextant Navigation System as Measured by Post-operative CT
W.S. Murphy, J.H. Kowal, S.B. Murphy

SESSION 11: UNI

Chairmen: C.C. Castelli, B. Jamaraz

09.20 Clinical results from a RCT Comparing Robotic Surgical Assistance and Manual Unicompartmental Knee Arthroplasty
M. Blyth, A. MacLean, I. Anthony, P. Rowe, B. Jones

09.30 Kinematic walking assessment comparing robotic-assisted and conventional unicompartmental knee arthroplasty
A. Motesharei, P. Rowe, M. Blyth, B. Jones, A. MacLean, I. Anthony

09.40 Improving outcomes of lateral unicompartmental knee arthroplasty with robotic-assisted surgery
Coffee Break AND POSTERS Session Part 5

10:00  S29-S35 Were rated “SPECIAL POSTERS” indicating an exceptional quality of this work. Posters will be presented in five sessions, during which the authors of the respective session’s posters will be present at the poster booths. However, all posters and special posters of all sessions will be on display during the entire time of the meeting.

S29)  Navigation system for arthroscopic anterior cruciate ligament reconstruction - New 2D-3D Image registration method using arthroscopic images  
      S. Watanabe, T. Sato, G. Omori, R. Nakamura, Y. Shiga

S30)  Three-dimensional analysis of acute scaphoid fracture displacement  
      Y. Schwarcz, Y. Schwarcz, E. Peleg, L. Joskowicz, R. Wollstein, S. Luria

S31)  Making a diagnosis system of scoliotic by respirometry  
      H. Murayama, K. Kato, A. Yuji

S32)  The importance of 2mm and 2 degrees in Total Knee Balancing  
      P.S. Walker, P.A. Meere, C.P. Bell

S33)  Robot-assisted versus conventional total knee replacement: a systematic review  
      A. Mahmood, M. A. Bashir, G. Kumar

S34)  Complications resulting from trackers  
      A. Thomas, G. Pemmaraju, S. Deshpande

S35)  Fast Accurate Procedure for accurate identifying the Current pose of an intramedullary nail  
      H. Esfandiari, S. Amiri, D. Lichti, C. Anglin

74)  Kinematic navigation for the evaluation of the stability of the knee at least 2 years after the ACL reconstruction  
      R. Hart

75)  A prototype of surgical robotic system for anterior cruciate ligament reconstruction  
      K. Kim, M. Kim, S. Lee, S. H. Park, J. Kim, S. Jung

76)  Reliability of a smartphone app in diagnosis of ACL rupture  
      L. Valeo, R. Iorio, D. Mazza, A. Ferretti

77)  The influence of tunnel tibial slope on postoperative knee laxity after ACL reconstruction  
      C. Signorelli, T. Bonanzinga, N. Lopomo, A. Grassi, F. Raggi, G.M. Marcheggiani Muccioli, M. Maracci, S. Zaffagnini

78)  Does Implant Design Influence the Accuracy of Patient Specific Instrumentation in Total Knee Arthroplasty?  
      N. Goyal, A. Patel, M. Yaffe, M. Luo, S. D. Stulberg

79)  Computer Assisted Navigation system oncological Spine Surgery  
      S. Bandiera, S. Colangeli, A. Gasbarrini, G. Barbanti Brodano, S. Terzi, R. Ghermandi, M. Girolami, S. Boriani
80) Computer assisted total knee arthroplasty: a medium 2.5 years follow-up of 200 cases
    D. Notarfrancesco, A. Lamberti, F. Aquino, A. Zara, L. Russo

81) Clinical outcome of patient specific instrumentation total knee arthroplasty
    S. Thati, G. Kainth, M. Ganapathi

82) TKA strategy based on trochlea groove invariance
    Y. Vanderschelden, F. Leitner

83) Deep Dished highly congruent tibial insert in CR-TKA
    D. Bruni, I. Akkawi, F. Colle, G.F. Raspugi, S. Bignozzi, S. Zaffagnini, F. Iacono, M. Marcacci

84) Evaluation of bone deformity on alignment discrepancies during total knee arthroplasty
    using an image-free computer-assisted guidance system
    L. D. Angibaud, R. A. Liebelt, B. Gao, X. Silver

85) Effect of repetitive training practices using an image-free computer-assisted guidance system
    on cognitive and technical skills
    L.D. Angibaud, R.A. Liebelt, B. Gao, X. Silver

86) Introducing Monitored Real-Time Patient-Specific Technique for Total Knee Arthroplasty
    B.N. Stulberg, L.D. Angibaud, J.D Zadzilka

87) Quantitative accuracy assessment of pedicle screw insertion in spine surgery: initial study
    using Artis Zeego II intraoperative imaging robotic system
    A. Boutchichi, J. Boulanger, X. Banse, O. Cartiaux

    S. Sampath, B. Tigar

89) Three dimensional Virtual Surgery and Customised smart guides for open wedge HTO
    K. Oh, M. Trabish

90) Remote Rehabilitation after TKR using visualisation and monitoring techniques
    M. Ayoade, A. H. Deakin, K. Deep, T. E. Howe, L. Baillie

91) Risk Analysis and Usability evaluation of the zero-dose-c arm navigationsystem for applicationin Lumbar Interventions
    A. Janss, M. Fuente, A. Ladenburger, M. Strake, K. Radermacher

**ROOM 2:**

**10.00/11.00 SECOND BOARD EXECUTIVE MEETING**
SESSION 12: TKR miscellaneous

Chairmen: P. Cerveri, D. Stulberg

11.00 Computer navigated ligament balancing assessment in total knee replacement  
   J.B. Stiehl

11.10 Robot-assisted Total Knee Arthroplasty with Minimum Follow-up Nine years Compared  
   with Conventional Total Knee Arthroplasty  

11.20 Comparative Study of Robotic Total Knee Arthroplasty: Measured Resection vs Gap  
   Prediction Technique  
   J. Seon, H. Kim, E. Song, H. Park, K. Lee, C. Park, S. Na

11.30 Functional comparisons between conventional mechanical alignment and shapematch  
   kinematic alignment in TKA via video-fluoroscopy and EMG  
   A. Leardini, A. Ensini, C. Belvedere, S. Tamarri, P. Barbadoro, M. D'Amato, S. Giannini

11.40 A Novel Method for Accurate Determination of Knee Prosthesis sizing in TKA Navigation  
   A. Boyer, C. Hamad, F. Bertrand, S. Polakovic, S. Lavallée

12.00 SCIENTIFIC AWARDS CEREMONY  
   B. Davies

12:15 INVITATION TO THE 15° ANNUAL MEETING  
   A. Hodgson

12.25 CLOSING REMARKS  
   N. Confalonieri
Robotic Hip and Knee Surgeries Re-Live Lunch Workshop

Friday 20 June, h. 13.00, Borromeo room

Chairman
Norberto Confalonieri
Chief of Orthopaedic and Traumatology Department of Clinical Institutes of Improvement (CTO) - Milano, Italy

Moderator
Douglas E. Padgett
Hospital for Special Surgery, New York, NY, USA

Programme:

Introduction
Norberto Confalonieri

Re-Live from Verona: THA
Piergiuseppe Perazzini – Casa di Cura San Francesco, Verona, Italy

Re-Live from Abano Terme: Lateral UKA
Davide Bertolini - Policlinico di Abano Terme, Abano Terme, Italy

Re-Live from Modena: Medial UKA
Fabio Catani – Policlinico di Modena, Modena, Italy

Discussion

Box Lunch will be provided.
Please be aware that number of participants is limited to 50 persons on a first come first serve basis.
For more info and registration: info@keywordeuropa.com
CAS innovation in joint replacement

Presidente: Prof. N. Confalonieri

VENERDÌ 20 GIUGNO 2014
ore 13.30 • Club Bar
Box lunch incluso

CAS 2014 Milan
International Society for Computer Assisted Orthopaedic Surgery

CAS innovation in joint replacement

Presidente: Prof. N. Confalonieri

Moderatori: Prof. C. Castelli, Prof. R. D’Anchise

PROGRAMMA

13.30 Il sistema di navigazione DASH / BrainLab per la chirurgia protesica computer assistita dell'anca
Dr. M. Ulivi, Dr.ssa V. Merini, Dr. V. Lavagna

13.45 L'impianto della protesi di ginocchio con l'assistenza di un sistema di navigazione
Dr. F. Cividini

14.00 La navigazione monocompartimentale di ginocchio con il sistema Monet / Orthokey
Prof. N. Confalonieri

14.15 Discussione
To carry out an event such as CAOS would not be possible without the support and contributions by the following companies and organizations. Their help is highly appreciated.

**Gold Sponsors**
